

SPINOFF AND STARTUP COMPANIES ON PHOTONICS IN ITALY

BEST PRACTICES OF SUCCESS AND CHALLENGES

A focus on entrepreneurship in Photonics, to understand what the IEEE PHOS can do for photonics spinoffs in Italy, aiming at the creation of a network.
A great opportunity to discover types of products, projects and developments.
The event is addressed to IEEE PS IC members, young researchers, PhD students and new university spinoffs.

A hand holding a red marker is pointing to a circuit diagram. The diagram consists of blue lines forming a complex path with several pink rectangular segments. To the right of the main path, there are four circles arranged vertically, connected to the main path by thin lines.
